

# IWS System: Fresh Water for Your Home

The IWS system is an innovative home water purification solution, guaranteed for life. A fully hydraulic product that operates without electricity and without chemical additives, providing light and refreshing water.

# Lifetime Warranty

## Comprehensive Coverage

The IWS system is guaranteed for life against manufacturing and material defects, providing peace of mind and long-term reliability.

## Warranty Exclusions

- Flooding
- Tampering with the system
- Falls due to improper installation

Any attempt to open the system will void the warranty.

# Essential Installation Requirements

## Dedicated Technical Room

Installed in the boiler room or technical room. Cannot be installed under the kitchen sink or inside the house.

## Technical Specifications

**Maximum Pressure:** 5 bar

**Flow Rate:** 4 MC<sup>3</sup>/hour

# Mandatory Materials

## Copper Pipes

Pipes must be of **uncoated copper** with an internal diameter of at least 16 mm.

## Fittings

The fittings used must be made of **copper or brass**.

- ❏ Follow the assembly diagram that will be sent and explained, and remove the protective film before installation. The hydraulic circuit should avoid too many connections before use.

# Safety Distances

## Minimum Distance
